

Sirs- Being an avid fan of satellite TV and radio, and a fan of Don Imus, I am increasingly being made aware of the efforts the FCC is making to staunch broadcasters. I do not find your efforts to be in my best interests nor those of my family. Please relay to Mr. Powell my concern for the recent efforts to prevent my satellite radio provider from broadcasting local information concerning weather and traffic conditions. I believe that XM radio has brought me better, more varied and representative radio broadcasts and I do not support your attempts to limit their broadcasts. Thank you, Mark
